

JDisc Discovery finds all the dependencies within your network!

Networks grow over time making it increasingly difficult to keep track of all the dependencies within them. Especially when it comes to consolidation or migration projects, it is essential to know how your servers communicate with each other and with their clients. JDisc's dependency mapping add-on detects all TCP/IP connections within your network and creates dependency graphs to visualize them.

Your benefits at a glance:

- Operational in only 5 minutes
- Fast results, since no agent installation is required
- Discovers up to 1500 devices per hour
- Detects all open TCP/IP ports for all major operating systems
- Finds TCP/IP connections between computers within your network
- Creates graphical maps to visualize dependencies
- The ideal product for supporting your migration or consolidation projects

JDisc UG (haftungsbeschränkt)
Herrenberger Str. 35

JDisc Discovery Capabilities

Discovery

- Takes an inventory of your network without the need to install proprietary agents
- Scans computers running Windows, Linux, IBM AIX, HP-UX, Sun Solaris and Mac OS X
- Detects open TCP/IP ports
- Finds all TCP/IP connections for devices within your network

Reporting

- More than 20 standard reports show device details, IP networks, Active Directory objects and Windows domains
- Create your own reports with JDisc Discovery's custom reporting
- Export reports in Microsoft Excel or CSV format
- Restrict reports to device groups

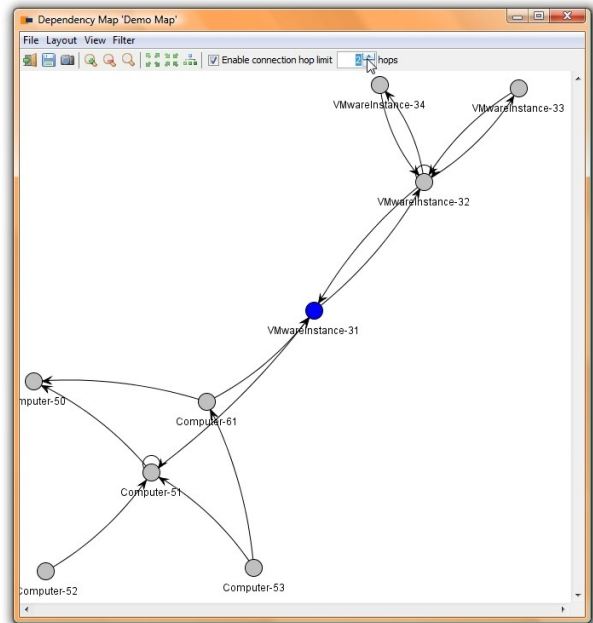

Name	IP Address	Manufacturer	Model	Type	OS Version	Patch
Computer-9	12.24.15.52			Computer	Windows Server 2003	Service

Scalability

- Take an inventory with JDisc Discovery of up to 36000 devices per day
- The flexible and efficient password administration scales for small to enterprise size companies
- The integrated SQL data base stores all your data reliably and efficiently

Mapping

- Determines open TCP/IP ports and TCP/IP connections between devices on the network
- JDisc Discovery graphically displays TCP/IP connections between computers using dependency maps

Scheduling

- Discovery scans can be scheduled and executed automatically
- Select different ranges of networks as well as time and frequency of scans

Support / Maintenance / Upgrades

- We provide custom support via email and telephone hotline.
- We offer consulting and training on request.
- All software updates are included in a support contract.

Pricing

- **Permanent license:** Purchase a perpetual license if you wish to use JDisc Discovery permanently. Pricing depends on the number of devices.
- **Short-Term license:** Acquire a short-term license if you wish to use JDisc Discovery only for the duration of a project. The minimum duration is one week. Pricing depends on license duration (number of weeks) and number of devices.
- **Annual subscription:** Buy an annual subscription if you wish to use the product for one or several years. Pricing depends on the number of devices.
