

Find out how your Company is wired!

## A must-have tool for network administrators!

JDisc Discovery already provides all the inventory information that you need at your fingertips. The Networking Add-On seamlessly integrates into JDisc Discovery and shows how your devices are connected to the network. In addition to determining network topology, the add-on also creates configuration backups of your routers and switches. The configuration history of your routers and switches will help you make the necessary configuration changes if something should go wrong on your network. Once again, all the information you need – right at your fingertips!

### Your benefits at a glance:

- Installs on top of JDisc Discovery within 3 minutes
- Discovers your network's topology at an incredible speed
- Visualizes layer 3 and layer 2 topology by means of interactive maps
- Shows all available and used router and switch ports
- Backs up your router and switch configurations
- Keeps a change history of your router and switch configurations
- Easy configuration of new data collection options for routers and switches
- Enhanced router inventory, including installed modules

# JDisc Discovery – Networking Add-On Capabilities

## Topology

- Discovers network topology using Cisco Discovery Protocol (CDP) and Link Layer Discovery Protocol (LLDP) information
- Determines how your devices connect to the network infrastructure using the bridge MIB.
- Creates layer 3 and layer 2 topology maps
- Displays available and used router and switch ports

- Saves topology maps for later reuse
- Exports maps as images for integration in other documents
- Identifies which device is connected to which switch port
- Create your own customized reports containing topology information

## Enhanced Router and Switch Discovery

- Collects installed modules for all major routers and switches

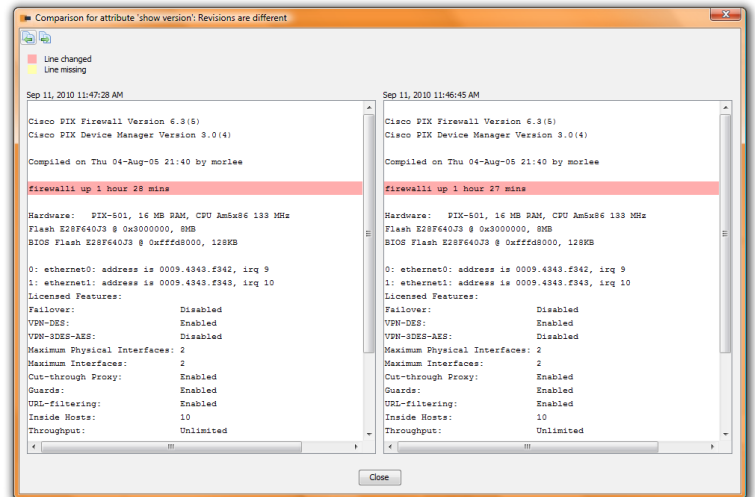

## Reporting

- Create your own customized topology reports including detailed device information
- Displays available and used router and switch ports

## Configuration File Collection

Collect configuration files from

- Cisco IOS (Internet Operating System) routers and switches
- Cisco ASA (Adaptive Security Appliance) and PIX (Private Internet eXchange) firewalls
- HP ProCurve switches

- Maintain an unlimited history of all your configuration files
- Review the configuration at different points in time
- Compare any two revisions and find out what has changed
- Enhance the standard data collection with your own commands. For instance, add your own show commands (such as "show tech") for Cisco IOS devices

## Support / Maintenance / Upgrades

- We offer free support during the evaluation phase
- We provide custom support via email and telephone hotline
- We offer consulting and training on request
- All software updates are included if a support contract is purchased.

## Pricing

The networking add-on requires a valid JDisc Discovery installation.

- **Permanent license:** Purchase a perpetual license if you wish to use JDisc Discovery permanently. Pricing depends on the number of devices.
- **Short-Term license:** Acquire a short-term license if you wish to use JDisc Discovery only for the duration of a project. The minimum duration is one week. Pricing depends on license duration (number of weeks) and number of devices.
- **Annual subscription:** Buy an annual subscription if you wish to use the product for one or several years. Pricing depends on the number of devices.
